

New Price Quote for Italian Imported Optical Modules

AI Overview

Italian imported optical modules, including SFP and 25G SFP28 types, are priced based on module type, technology, and shipping/import considerations, with typical EXW/FOB prices starting around \$150–200 per unit.

Pricing Overview

For Italian customers, Optcore SFP transceivers are available at reasonable prices, with most 1G SFP modules priced in the EXW (Ex-Works) or FOB terms, meaning the modules are collected at the warehouse in China and do not include shipping, import tariffs, or taxes in Italy. Delivery within major Italian cities such as Rome, Milan, Naples, Turin, Palermo, and Genoa typically takes 3–5 days via FedEx or UPS, and orders over \$75 may qualify for free delivery. Payment in Euros is supported, which can reduce currency exchange costs. High-speed modules, such as 25G SFP28 optical modules, are increasingly in demand due to 5G deployment, fiber-to-the-home (FTTH) initiatives, and data center upgrades. The Italian 25G SFP28 market was valued at approximately USD 1.2 billion in 2024, with a forecast CAGR of 15.4% through 2033. Prices for these modules are influenced by semiconductor fabrication costs, assembly techniques, and supply chain factors, with cost reductions expected as production scales and technology matures.

Factors Affecting Price

- **Module Type and Speed:** Higher-speed modules (25G, 100G, 400G) carry a premium due to advanced engineering and materials.
