

Nordic CIF Price SFP Optical Module QSFP

AI Overview

SFP and QSFP optical modules in the Nordic region typically range from €50–€500 per unit depending on type, speed, and vendor, with third-party modules offering cost-effective alternatives to OEM products.

Overview of SFP and QSFP Modules

- SFP (Small Form-factor Pluggable) modules are commonly used for 1G to 25G connections, supporting short- and long-range fiber links.
- QSFP (Quad Small Form-factor Pluggable) modules, including QSFP+, QSFP28, and QSFP-DD, support higher speeds from 40G to 400G, suitable for data centers and high-density networking applications .

Pricing Factors

The CIF price of optical modules depends on several factors:

- Module Type and Speed: Higher-speed modules like 100G QSFP28 or 400G QSFP-DD are more expensive than 10G SFP or 40G QSFP+ modules .
- Vendor and Brand: OEM modules (Cisco, HUAWEI, Dell) are generally more expensive, while third-party manufacturers (QSFPTEK, Solidoptics, ProLabs) offer lower-cost alternatives with comparable performance .
- Volume and Bulk Orders: Large orders often receive discounts; for example, QSFPTEK offers an extra 5% discount for orders of 10+ pieces .
- Engineering and Production Costs: Costs include chipsets, optical components, assembly, testing, and overhead, which are reflected in the final CIF price .
