

Pakistan Power Distribution Unit

Overview

Electricity in Pakistan is generated, transmitted and distributed by two vertically integrated public sector companies, the first one being Water and Power Development Authority (WAPDA) responsible for the production of hydroelectricity and its supply to the consumers by. Electricity in Pakistan is generated, transmitted and distributed by two vertically integrated public sector companies, the first one being Water and Power Development Authority (WAPDA) responsible for the production of hydroelectricity and its supply to the consumers by. Electricity in Pakistan is generated, transmitted and distributed by two vertically integrated public sector companies, the first one being Water and Power Development Authority (WAPDA) responsible for the production of hydroelectricity and its supply to the consumers by electricity distribution. Over the past three decades, Pakistan's energy sector has undergone significant reforms to enhance operational performance and meet growing energy demands. However, the electricity market still faces challenges, including prolonged blackouts, electricity theft, high circular debt and poor service. Explore the distribution of 220 kV and 500 kV grid stations nationwide, along with DISCO-wise village electrification details and trends in transmission lines expansion.
