

Price for Correct Wiring of Distribution Box

AI Overview

The cost to correctly wire a distribution box typically ranges from \$1,200 to \$6,000 depending on panel size, amperage, location, and complexity of installation.

Cost Overview

For a standard residential setup, rewiring or replacing a 100-125A indoor distribution box usually costs \$1,200-\$2,500, including labor, materials, and permits. Larger systems, such as a 200A outdoor panel with a new meter socket, can reach \$3,000-\$6,000 due to higher capacity, weatherproof enclosures, and additional wiring requirements .

Factors Affecting Price

- **Amperage and Panel Size:** Higher amperage panels (200A vs 100A) and more circuits increase material and labor costs .
- **Location:** Outdoor installations require weatherproof enclosures and may involve more complex wiring, raising costs .
- **Wiring Complexity:** Longer wiring runs, rerouting, or structural modifications can add to labor expenses .
- **Permits and Code Compliance:** Local electrical codes, inspections, and permits can add 5-15% to the total cost, especially in urban areas .
- **Material Quality:** Steel or high-rated IP/NEMA enclosures, circuit breakers, busbars, and surge protectors influence pricing .
