

Price of 90° elbow for cable trays

AI Overview

The price of a 90-degree cable tray elbow connector typically ranges from \$15 to \$150 per piece, depending on material, size, and load capacity.

Pricing Overview

- **Material:** Stainless steel or galvanized steel elbows are generally more expensive (\$50–\$150) due to durability and corrosion resistance, while aluminum or fiberglass options are lighter and may cost \$15–\$80 per piece .
- **Size and Type:** Larger elbows designed for heavy-duty ladder trays or high-capacity cable systems cost more than smaller, standard-size fittings . Horizontal and vertical elbows may also differ in price.
- **Supplier and Brand:** Premium brands or suppliers offering CE-marked, fire-resistant (E90) elbows may charge higher prices, reflecting compliance with industrial standards .

Factors Affecting Cost

- **Load Capacity:** Elbows rated for higher loads or industrial applications are more expensive.
- **Finish and Coating:** Powder-coated or galvanized finishes increase corrosion resistance and longevity, adding to the cost.
- **Installation Features:** Some elbows come with pre-drilled holes, easy-slide fittings, or modular designs that simplify installation, which can slightly increase the price .
- **Quantity:** Bulk purchases often reduce the per-piece cost, especially for large construction or industrial projects.
