

# Price of Level 1 and Level 2 Distribution Boxes

## AI Overview

Level 1 distribution boxes typically range from \$50 to \$200, while Level 2 units can cost between \$200 and \$800 or more depending on capacity and features.

### Level 1 Distribution Boxes

Level 1 distribution boxes are generally basic residential or small commercial units designed for lower amperage and fewer circuits. Prices for these units usually start around \$50 for simple single-phase boxes and can go up to \$200 for more robust models with additional safety features, weatherproofing, or modular circuit options. These boxes often include standard circuit breakers, fuses, and basic enclosures suitable for indoor installations.

### Level 2 Distribution Boxes

Level 2 distribution boxes are larger, higher-capacity units suitable for commercial, industrial, or advanced residential applications. They typically support three-phase power, higher amperage, and more circuits, and may include smart monitoring, surge protection, and modular expansion capabilities. Prices for Level 2 boxes generally range from \$200 to \$800 or more, depending on specifications such as voltage rating, number of circuits, material construction, and integrated safety features. Outdoor-rated or weather-resistant units often carry a premium.

### Factors Affecting Price

- Amperage and voltage capacity: Higher ratings increase cost.
- Number of circuits: More circuits require larger enclosures and more components.
