

Price of Low-Voltage Fiber Optic Distribution Box

AI Overview

Low-voltage fiber optic distribution boxes typically range from \$20 to \$150 per unit, depending on capacity, type, and features.

Price Overview

The cost of a fiber optic distribution box varies based on several factors:

- **Core Capacity:** Boxes supporting 1–4 cores are generally cheaper (\$20–\$40), while larger boxes for 24–48 cores can cost \$80–\$150 or more .
- **Indoor vs Outdoor:** Outdoor boxes with IP65 or higher ratings for dust and water protection are more expensive than indoor models .
- **Material and Durability:** High-impact ABS+PC enclosures designed for long-term mechanical protection increase the price .
- **Additional Features:** Integrated splitters, dual-layer designs, or compatibility with FTTH drop cables can add to the cost .

Typical Configurations

- **Indoor Wall-Mount Boxes:** Compact, low-cost, suitable for office or residential installations.
- **Outdoor Weatherproof Boxes:** IP65-rated, UV-resistant, suitable for street cabinets or pole-mounted installations.
- **Rack-Mountable ODF Cabinets:** Centralized fiber management in data centers, higher cost due to size and capacity.
