

Price of Low Voltage Shielded Cable Trays

AI Overview

Low voltage shielded cable trays typically range from \$20 to \$150 per foot, depending on material, size, and shielding features.

Overview

Low voltage shielded cable trays are designed to safely route low-voltage and data cables while minimizing electromagnetic interference. They are commonly made from powder-coated galvanized steel, stainless steel, or wire mesh, and may include additional shielding elements to reduce stray fields in sensitive environments such as hospitals, laboratories, and industrial facilities .

Price Range

- **Wire Mesh Trays:** Standard low-voltage wire mesh trays, such as those from Legrand, generally cost \$20-\$50 per foot for basic sizes (e.g., 4-inch side rails, 30-inch width) and can increase with larger widths or patented load-optimized designs .
- **Shielded or Specialized Trays:** Trays with integrated shielding to reduce electromagnetic interference, like Systron CableShield systems, can cost \$80-\$150 per foot or more, depending on the shielding material, current rating, and installation complexity .
- **Bulk or Custom Orders:** Suppliers on platforms like Alibaba offer customizable low-voltage cable trays in bulk, which can reduce per-foot costs but vary widely based on dimensions, finish, and quantity .
