

Price of Mesh Cable Management Frame Tail Cable

AI Overview

The price of a Mesh Cable Management Frame Tail Cable typically ranges from \$20 to \$150 depending on size, material, and supplier.

Overview

Mesh cable management frames are used to organize and route cables in data centers, server racks, and FTTH networks. They help maintain proper bend radius, improve airflow, and prevent cable damage. Tail cables or frame extensions are often part of these systems, allowing flexible routing and connection to patch panels or closures.

Factors Affecting Price

- **Material and Build:** Wire mesh or ladder-style frames are more durable and may cost more than simple plastic or composite frames.
- **Size and Rack Units:** Horizontal or vertical frames for 1U-4U racks vary in price; larger frames supporting more cables are more expensive.
- **Brand and Supplier:** Premium brands like Cablofil or APC may charge higher prices due to quality, modularity, and faster delivery.
- **Accessories:** Some frames include mounting brackets, covers, or straps, which can increase the total cost.

Typical Pricing

- Small or basic mesh frames: \$20-\$50
