

Price of T-junction for converting high cable tray to low cable tray

AI Overview

The price of a T-junction for cable trays typically ranges from \$20 to \$150 per piece, depending on size, material, and supplier.

Overview

A T-junction or T-piece is used to connect three cable trays, allowing a high cable tray to branch into a lower tray or create a 90-degree junction in cable management systems . These fittings are available in galvanized steel, stainless steel, or PVC-based thermoplastic materials, with corrosion-resistant finishes for durability . Sizes vary to match standard cable tray widths, such as 60x100 mm, 60x150 mm, or 60x200 mm .

Price Factors

- Material:
 - Galvanized steel or stainless steel T-junctions are more expensive due to durability and corrosion resistance.
 - PVC or thermoplastic T-joints are generally cheaper and suitable for insulating applications .
- Dimensions:
 - Larger trays or higher load capacities increase the cost.
 - Standard small T-junctions (e.g., 60x60 mm) may cost around \$20-\$40, while larger industrial sizes (e.g., 300x60 mm) can reach \$100-\$150 .
