

Price of Tray-type Plastic Cable Trays

AI Overview

Tray-type plastic cable trays typically range from \$10 to \$100 per meter, depending on material, size, and supplier.

Price Overview

The cost of tray-type plastic cable trays varies widely based on material, dimensions, and purchase volume. Common materials include PVC, HDPE, and polycarbonate, each with distinct properties affecting price. PVC trays are generally the most cost-effective, suitable for indoor applications, while HDPE offers higher impact resistance and UV stability for outdoor use, often at a higher price point. Polycarbonate trays are premium options with exceptional strength and durability.

- Small-scale or consumer-grade trays (for home offices or under-desk setups) are available on platforms like Amazon, typically ranging from \$10 to \$30 per tray.
- Industrial or commercial-grade trays purchased in bulk from suppliers like Alibaba or Made-in-China can range from \$20 to \$100 per meter, depending on size, load capacity, and customization options.
- Perforated vs. solid trays: Perforated trays, which allow airflow and drainage, may cost slightly more than solid trays due to manufacturing complexity.

Factors Affecting Price

- Material Type: PVC is cheaper, HDPE is mid-range, and polycarbonate is premium.
- Tray Size and Load Capacity: Wider or thicker trays designed for heavy cables cost more.
