

# Price of dual-core fiber optic splice boxes for data center interconnection in Latvia

## AI Overview

Dual-core fiber optic splice boxes for data center interconnection typically range from €30 to €120 per unit, depending on brand, features, and supplier.

### Overview

Dual-core fiber optic splice boxes, also known as fiber splice enclosures or optical distribution boxes, are essential for securely connecting and managing fiber optic cables in data centers. They protect spliced fibers from environmental factors, allow organized cable routing, and facilitate maintenance and expansion. These boxes are usually installed in 19" server racks or network cabinets and support common connector types such as LC, SC, E2000®, or ST.

### Price Range

- Entry-level models: Around €30–€50, typically basic enclosures with minimal features and IP20 protection.
- Mid-range models: €60–€90, offering better material quality, removable splice cassettes, and easier access for maintenance.
- High-end or pre-assembled models: €100–€120+, often fully equipped, stackable, and ready for immediate deployment in data centers. Prices may vary depending on supplier, shipping costs, and local taxes in Latvia. International suppliers like Phoenix Contact, LAPP, and EFB-Elektronik provide options that can be shipped to Latvia. Online marketplaces such as Amazon or specialized distributors may also offer competitive pricing, but availability and shipping fees should be confirmed.
