

Price of fiber optic cable for mobile ducts

AI Overview

The cost of laying fiber optic cable in mobile ducts typically ranges from \$1.50 to \$7 per linear foot, depending on fiber type, strand count, and installation complexity.

Material Costs

- Single-mode fiber: \$0.10 to \$0.50 per foot for the cable itself; multimode fiber ranges from \$0.30 to \$1.00 per foot. Higher strand counts increase costs proportionally, e.g., a 12-strand cable costs around \$0.50/ft, while a 24-strand cable can reach \$1.00/ft .
- Armored or reinforced cables: \$0.50 to \$5 per foot, suitable for harsh environments or direct burial .
- Specialized cables: LSZH (low-smoke zero halogen) or plenum-rated cables add \$0.25-\$0.40 per foot .

Installation Costs in Mobile Ducts

- Labor and duct installation: Typically \$1 to \$6 per foot, with complex routing through existing ducts or obstacles increasing costs to \$7-\$12 per foot .
- Directional boring or duct crossings: \$3 to \$7 per foot to avoid surface disruption .
- Use of existing ducts: Can reduce costs significantly compared to new trenching or conduit installation .

Total Project Considerations

- Per-drop pricing: Commercial fiber drops range from \$250 to \$1,000 each, depending on termination and routing complexity .
