

Price of household electrical distribution box circuit

STAINLESS STEEL WIRE MESH

Long-lasting and durable

Comprehensive specifications

Customized non-standard products

AI Overview

Household electrical distribution boxes typically range from \$50 to \$500, depending on capacity, features, and installation requirements.

Typical Price Ranges

For standard residential use, basic single-phase distribution boxes with 6–12 ways (slots for circuit breakers) usually cost \$50–\$150. More advanced units with 16–24 ways, additional safety devices like RCBOs (Residual Current Breaker with Overcurrent protection), surge protection, or modular designs for future expansion can range from \$150–\$500. Outdoor or weatherproof units, as well as smart-enabled boxes with energy monitoring, may carry a premium.

Factors Affecting Cost

- **Number of Circuits (Ways):** More slots allow for additional circuits, such as dedicated lines for high-power appliances, EV chargers, or solar panels.
- **Safety Features:** Overload protection, short-circuit protection, reliable circuit breakers, and surge protection devices increase both safety and cost.
- **Material and Build Quality:** Durable metal enclosures and weatherproof designs are more expensive than basic plastic indoor units.
- **Smart Features:** Modern distribution boxes may include remote monitoring, digital displays, and integration with home automation systems, which can raise the price.
- **Installation Costs:** Professional installation is recommended for safety and compliance with electrical codes, adding to the overall investment.
