

Price of standard electrical distribution boxes at construction sites

AI Overview

Standard electrical distribution boxes for construction sites typically range from \$150 to \$600 per unit, depending on capacity, material, and features.

Typical Price Range

Standard distribution boxes used on construction sites generally cost between \$150 and \$600 for basic units suitable for temporary power distribution . Prices vary based on:

- **Material:** Plastic or thermoplastic enclosures are usually less expensive, while sheet steel or fiberglass units designed for durability and outdoor use cost more .
- **Voltage and Amperage:** Single-phase boxes for light-duty applications are cheaper, whereas three-phase boxes for heavy-duty construction equipment command higher prices .
- **Number of Circuits and Outlets:** More circuits or integrated breakers increase the cost .
- **Environmental Rating:** Weather-resistant or IP65/IP67-rated boxes for outdoor use carry a premium .

Installation and Operational Considerations

While the purchase price is the primary cost, installation, maintenance, and operational factors can affect the total investment :

- **Pre-wired units** reduce labor costs but are slightly more expensive upfront.
