

Price of transparent switch for distribution box

AI Overview

Transparent switch boxes for distribution panels typically range from \$5 to \$50 per unit, depending on size, material, IP rating, and order quantity.

Overview

Transparent switch boxes are designed to protect electrical components while allowing visibility of switches and circuit breakers. They are commonly made from PVC or durable plastics and come with IP65–IP67 waterproof ratings, making them suitable for indoor and outdoor applications. These boxes are used in industrial automation, telecommunications, and general electrical distribution systems.

Price Range

- Small wall-mounted PVC boxes: Approximately \$5–\$15 per unit for standard sizes and IP65 rating.
- Medium to large distribution boxes with transparent covers: Around \$20–\$50 per unit, often with IP66–IP67 ratings and enhanced durability.
- Wholesale or bulk orders: Prices can drop significantly per unit, especially for orders of 50–100+ units, and suppliers often offer OEM customization including logo embossing or custom busbar layouts.

Features Affecting Price

- Material: PVC is cheaper, while aluminum or stainless steel options cost more.
- IP Rating: Higher waterproof and dustproof ratings (IP66–IP67) increase cost.
