

Price per meter of 4-core drop fiber optic cable

AI Overview

The price of a 4-core fiber optic drop cable typically ranges from \$0.40 to \$1.80 per meter, depending on type, environment, and bulk order volume.

Typical Pricing

- Indoor distribution cables: Around \$0.40 per meter for standard PVC-jacketed, tight-buffered single-mode 4-core cables .
- Outdoor or ruggedized/armored cables: Prices can reach \$1.80 per meter, designed for harsh environments with enhanced protection .
- Bulk purchase discounts: For orders exceeding 1,000 meters, suppliers often provide tiered pricing, reducing the per-meter cost .

Factors Affecting Price

- Cable Type and Construction: Armored cables or outdoor-rated cables cost more than indoor LSZH or PVC cables due to additional protective layers and environmental resistance .
- Fiber Material: Single-mode glass fibers are standard for high-speed, long-distance transmission and are slightly more expensive than multimode fibers .
- Order Volume: Larger orders (≥ 5 km) typically reduce the unit price per meter .
- Customization: Special lengths, color-coded jackets, or hybrid configurations may increase cost slightly but improve installation efficiency and maintenance .
