

Price quote for mobile overhead optical cables

AI Overview

Mobile overhead optical cable typically costs between \$1 and \$6 per foot for materials, with total installation costs ranging from \$2 to \$14 per foot depending on complexity and location.

Material Costs

The cost of fiber optic cable materials varies based on fiber type, strand count, and quality. Single-mode fiber generally costs less per foot than multimode fiber, while high-performance or armored cables are more expensive. For bulk purchases, wholesale prices can range from \$0.09 to \$1.52 per foot, whereas retail prices are typically \$1 to \$6 per foot . Overhead installations may require additional materials such as poles, brackets, and securing hardware, which can increase the material cost .

Installation Costs

Overhead fiber installation is generally less expensive than underground deployment due to reduced trenching and excavation requirements. Labor costs depend on the complexity of the installation, terrain, and local labor rates. Typical installation costs for overhead fiber can range from \$1 to \$3 per foot for standard runs, with more complex or expedited projects costing more . For example, a mid-range outdoor run with conduit and multiple terminations may total \$4,940-\$6,120 for 2,000 feet, while premium installations with armored cable and professional testing can reach \$11,000-\$14,500 for 5,000 feet .
