

Purchase Price of Fireproof Metal Cable Trays

AI Overview

Fireproof metal cable trays are available from \$0.32 to \$12 per unit, depending on material, size, and fireproofing features.

Pricing Overview

Fireproof cable trays vary widely in price based on material, design, and fire resistance rating. Common materials include carbon steel, stainless steel, aluminum, and fiberglass-reinforced composites. Carbon steel trays are often galvanized or coated with intumescent fireproofing, allowing them to withstand temperatures above 1000°C for 90–120 minutes, which increases cost compared to standard trays. Stainless steel and aluminum options offer enhanced corrosion resistance and longevity, making them more economical over time despite higher upfront costs .

Typical Price Range

- Wholesale and bulk orders: \$0.32 to \$12 per unit, with a minimum order quantity of 10 units .
- Custom options: Hot-dip galvanized, perforated, anodized, or powder-coated finishes may increase the price .
- High-performance fireproof trays: Stainless steel or trays with specialized intumescent coatings for industrial applications are at the higher end of the price spectrum .
