

Security Network Core Switch S7706

AI Overview

The Huawei S7706 is a high-end modular core switch designed for enterprise-scale networks, offering flexible scalability, high-density 10G/40G ports, and advanced features for campus and data center core deployments.

Overview

The Huawei CloudEngine S7706 is part of the S7700 series of intelligent routing switches, designed for next-generation enterprise networks. It is a modular chassis switch that supports high-performance switching and forwarding, making it suitable for core and aggregation layers in campus networks and data centers. The S7706 chassis is sold as a base unit, with additional components such as main control boards, service modules, power supplies, and fan modules purchased separately.

Key Features

- High-density modular design: Supports flexible expansion of ports and modules to meet growing network demands.
- Advanced routing and switching: Provides intelligent routing, VXLAN support, and converged network capabilities for voice, video, and data.
- Redundancy and reliability: Key components are designed with redundancy to minimize downtime and ensure business continuity.
- Energy efficiency: Features innovative energy-saving chips and intelligent power management to reduce operational costs and support sustainable network deployment.
