

Senegal Warranty Smart Patch Panel 2-Core

AI Overview

Smart Patch Panels, including 2-core configurations, offer intelligent network management with real-time monitoring, automated tracking, and warranty-backed support, which can be deployed in Senegal through authorized distributors.

Overview

A Smart Patch Panel 2-Core is an intelligent network patching solution designed to manage and monitor physical network connections efficiently. These panels support both copper and fiber optic cabling, including single-mode and multimode fiber, and are compatible with IT Service Management tools for centralized control and reporting. They provide real-time visibility of network changes, such as port connections, disconnections, and unauthorized access, enhancing physical layer security.

Key Features

- **Automated Infrastructure Management (AIM):** Tracks every patch cord and port interaction, reducing human error and downtime.
- **Real-Time Monitoring:** Detects unintended physical changes and provides instant alerts for network administrators.
- **Software Integration:** Works with platforms like SMARTPATCH, PatchPro®, and EagleEye™ for centralized management and reporting.
- **Flexibility:** Modular design allows easy expansion and adaptation to office moves, terminal additions, or network upgrades.
