

# Simplest way to mark horizontal bends in cable trays

## Overview

Cut wires with B-Line Angular Bolt Cutter, bend to create a bend, tee, or reducer. The Offset Blade Cutter produces a clean cut. The. Calculate horizontal, vertical, or compound cable tray offsets based on bend angle, offset distance, and available installation space. Measure this distance along the straight tray. The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. When a wire cable tray is cut, the fact that a. Where delivery involves transshipment or rough handling en route it is recommended that products are packed in wooden crates or wooden cases. Only two splices are required to securely connect tray widths of wire basket tray. These arrangements can be created by using our standard cable tray sections and removing specific pieces as directed using the Cutter tool (WR-TRAYCTR65), and then bending and securing the tray pieces together using Couplers (WR-CPLKK34), Corner Strength Bars (WR-CNRSBAR-EZ).
