

Single-mode 8-core composite optical fiber

Overview

Single Mode Optical Fiber with 8 μm fiber core size, 2 m long, and stainless steel BX jacketing. Single-mode patch cords transmit efficiently from. Imm (main cord) Material Stainless Steel Color Silvery White UL94 V-0 (*Burning stops within 10 seconds on a vertical specimen, no drips of flaming particles.) *Exact product code is subject to the cable length. 8 core single mode fiber optic cable should be selected by fiber mode, core count, cable structure, jacket material, installation route, tensile strength, attenuation test, reel length, and quantity. B2B buyers should confirm application, quantity, quality standard, packaging, destination country. Two popular types of optical fiber cables are 8-core optical cable and 12-core single-mode indoor fiber optic cable. In this article, we will discuss the differences between these two cables in terms of their design, features, and applications. From a length of 100 meters, the fiber optic outdoor cables will be supplied on a. HES brand fiber optic cables are designed with high performance and reliability, especially focusing on single mode fiber technology to meet long-distance transmission needs.
