

Specifications of Explosion-proof Distribution Boxes in Argentina

AI Overview

Explosion-proof distribution boxes in Argentina are designed with flameproof enclosures, stainless steel construction, and ATEX/IECEx certifications for safe operation in hazardous industrial environments.

Materials and Construction

These distribution boxes are typically made from stainless steel AISI 304 or 316L, or Q235 steel, providing high corrosion resistance and durability in extreme conditions . Some models also use glass-reinforced polyester (GRP) for lightweight and corrosion-resistant enclosures . The boxes feature specialized hinge structures to protect flameproof joints during opening and closing, extending service life .

Certifications and Safety Standards

Explosion-proof distribution boxes in Argentina comply with ATEX and IECEx standards, ensuring safe operation in hazardous zones such as Zone 1, 2, 21, and 22 . They are rated for Ex db IIC T6 ... T41 Gb and Ex tb IIIC T80°C ... T130°C, suitable for environments with explosive gases, vapors, or dust . These certifications guarantee that the boxes prevent ignition of flammable substances, minimizing explosion risks .

Functional Features

- **Electrical Components:** Can include in-built MCBs, AC contactors, thermorelays, PLCs, soft starters, transducers, pushbuttons, universal switches, and display instruments .
