

Splitter Price Telecom Grade

AI Overview

Telecom-grade PLC splitters typically range from \$5 to \$50 per unit depending on split ratio, port count, and form factor.

Price Overview

The cost of telecom-grade PLC splitters varies based on several factors:

- **Split Ratio and Port Count:** Common configurations include 1x2, 1x4, 1x8, 1x16, 1x32, 1x64, and 1x128. Higher port counts generally increase the price due to more complex fabrication and higher material usage .
- **Form Factor:** Splitters can be bare fiber, ABS box, LGX cassette, or rack-mount types. Compact or rack-mount designs for high-density deployments are typically more expensive .
- **Material and Quality:** Telecom-grade materials ensure low insertion loss, high return loss, and long-term durability. High-quality SC/APC or LC connectors also add to the cost .
- **Customization:** OEM/ODM services for specific applications or integrated cassettes can increase unit price .

Typical Price Ranges

- **Low-port splitters (1x2, 1x4):** \$5-\$15 per unit .
- **Medium-port splitters (1x8, 1x16):** \$10-\$25 per unit .
- **High-port splitters (1x32, 1x64, 1x128):** \$20-\$50 per unit, with prices rising for environmental hardening or miniaturized packages .
