

Supplier ADSS optical cable G 652

Overview

652D FRP flat ADSS fiber optic cable, featuring 6 cores and spans from 200m to 1000m for aerial communication networks. Designed for high tensile strength, self-supporting installation, and outdoor durability, ideal for telecommunication and power. This specification covers the design requirements and performance standard for the supply of optical fibre cable in the industry. It also includes ARTIC premium designed cable with optical, mechanical and geometrical characteristics. ARTIC cable has excellent optical transmission and physical. ADSS (All Dielectric Self-Supporting) cables are designed for Overhead self-supporting applications at short, medium and long span distances. ARTIC ensures a stable quality control system for our cable products through several programs including ISO 9001, ISO 14001 and ROHS. All-dielectric self-supporting (ADSS) cable is a type of optical fiber cable that is strong enough to support itself between structures without using conductive metal elements.
