

Surface-mounted and concealed electrical boxes

AI Overview

Surface-mounted boxes sit on the wall for easy access, while concealed boxes are recessed into the wall for a flush, integrated appearance.

Surface-Mounted Electrical Boxes

Definition and Installation: Surface-mounted electrical boxes are installed directly onto a wall or mounting surface, with the box body visible and protruding outward. No cutting into the wall is required, making installation quicker and less invasive .

Materials: They are commonly made from plastic, aluminum, or steel, and are suitable for both indoor and outdoor applications . **Applications:** Surface-mounted boxes are ideal for exterior lighting, outdoor outlets, workshops, factories, industrial sites, and temporary or frequently modified electrical setups . They are also used for circuit breakers, junction boxes, security systems, power supplies, and fiber optic enclosures . **Advantages:**

- Easy to inspect, maintain, or replace wiring
- Quick installation without wall modifications
- Protects wiring from moisture, dust, and physical damage
- Compatible with various wall surfaces like brick, siding, or concrete
