

Surface-mounted electrical box for home and outdoor use

AI Overview

Surface-mounted electrical boxes provide a safe, accessible, and versatile solution for housing electrical connections in residential settings.

Overview

Surface-mounted electrical boxes are designed to enclose electrical wiring, switches, outlets, and other devices, offering protection from dust, moisture, and accidental contact while keeping wiring organized and accessible . Unlike recessed boxes, they are mounted directly on the wall or ceiling surface, making them ideal for retrofit projects, exposed wiring, or areas where wall cavities are not accessible .

Materials and Construction

Surface boxes are available in plastic, metal, and fiberglass:

- Plastic (thermoplastic): Lightweight, impact-resistant, and often self-extinguishing; ideal for indoor use and easy installation .
- Metal (pre-galvanized steel or die-cast aluminum): Durable, suitable for high-traffic areas, and provides grounding for electrical systems .
- Fiberglass: Resistant to corrosion and suitable for damp or outdoor environments .

Sizes and Configurations

Choosing the right size depends on the number of devices and wiring complexity:

- Single-gang boxes: For one switch or outlet.
