

Tonga acquires optical cables

Overview

Tonga Cable System is a submarine fiber-optic cable system connecting Tonga with Fiji, where it connects to other international networks. It is 827 kilometres (514 mi) long and was activated in 2013. It has cable landing points at Sopo, a suburb of Nuku'alofa in Tonga, and Suva, Fiji. We're working with the Governments of Tonga and New Zealand to build a new international undersea telecommunications cable to Tonga. The project will see the construction of a 383-kilometre long cable from a branching unit on the Hawaiki Cable to the existing cable landing station in Vava'u, Tonga. L'), a strategic Government asset. Today marks the Completion of the.
