

Tonga optical module buying and selling price

AI Overview

Optical module prices in Tonga are influenced by global market trends, with typical modules ranging from \$600 to \$1,900 depending on type, speed, and technology.

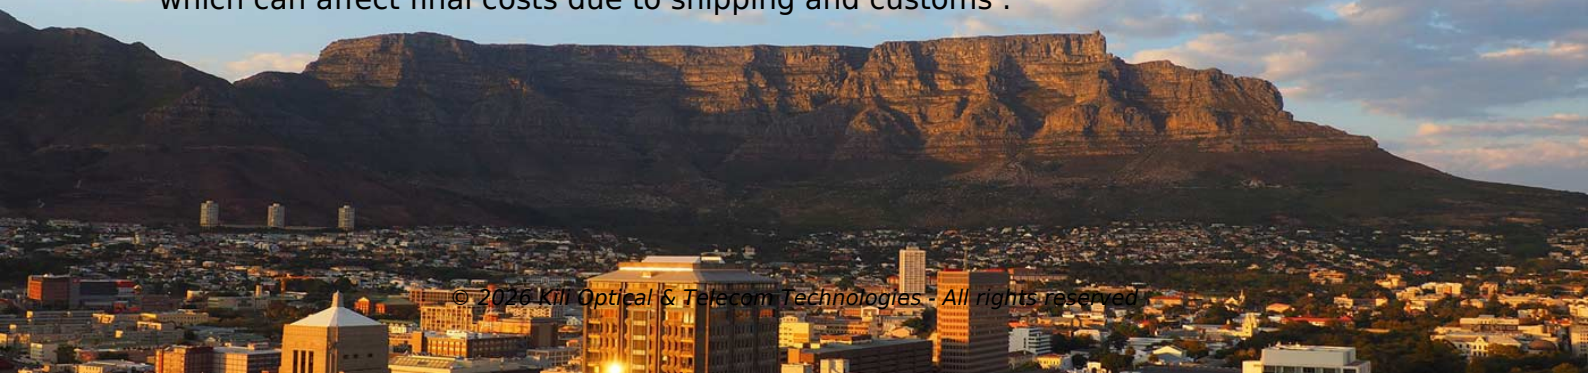

Price Ranges and Types

Optical modules, including SFP, SFP+, QSFP, and OSFP variants, vary widely in price based on data rate, reach, and technology maturity. For example, 400G QSFP-DD modules typically cost \$600–\$800, while 800G OSFP-FR4 modules for longer reach can range from \$1,500–\$1,900 in volume pricing scenarios. Lower-cost options like 800G LPO modules without DSP may be available for \$700–\$900. Prices are higher for OEM modules from brands like Cisco or Arista, which can command a 30–50% premium over third-party compatible modules.

Factors Affecting Prices

Several factors influence optical module pricing in Tonga:

- Raw materials and manufacturing: Lasers, silicon chips, and precision cleanroom production add significant cost.
- Technology and innovation: Newer modules with advanced features or higher speeds carry a premium.
- Supply chain and logistics: Tonga imports most optical fibers from New Zealand, which can affect final costs due to shipping and customs.
