

Venezuela fiber optic cable outage

Overview

In the early hours of January 29th, a malfunctioning electrical transformer caused a fire that damaged large amounts of fiber optic cables, leaving many parts of Barquisimeto without internet. This graph shows additional details related to IODA's Active Probing measurements, including Round-Trip Time (RTT) Latency and the percentage of IODA's probe packets that did not get a response. As the local fire department did not show up, it was put out by Civil Protection officials with a borrowed. Venezuela-based workers connected to the global technology ecosystem are facing an increasingly impossible situation: three to four power blackouts or internet failures are happening on an average week and the very fact of delivering services from Venezuela is now viewed with grave suspicion. This. The Internet Outages Map is an at-a-glance visualization of global Internet health over the last 24 hours, tracking Internet outages across ISPs, top application providers, public clouds, and edge service networks. This map automatically updates outage information every 5 minutes and shows ongoing. Sudan, Syria, and Iraq were among countries that experienced government-directed Internet shutdowns, in the last quarter, according to Cloudflare 's Q3 2025 Internet disruption summary. The report covers disruptions occurring in the three months to September 30. In a new study, the researchers found the crisis has significantly — and negatively — affected Venezuela's Internet infrastructure and.
