

Warranty on 200G Tunable Optical Module

AI Overview

Some 200G tunable optical modules, such as those from Carritech Optics, come with a lifetime warranty.

Warranty Overview

Carritech Optics offers lifetime warranty coverage on their 200G transceivers, which includes tunable CFP2-DCO optical modules . This warranty ensures that the modules are protected against manufacturing defects and performance failures for the duration of their operational life, providing confidence for deployment in data centers, cloud networks, and telecom infrastructures. Lifetime warranty typically covers repair, replacement, or support for defective units under normal operating conditions.

Considerations

- Vendor-specific policies: Warranty terms may vary depending on the supplier or manufacturer. While Carritech Optics provides lifetime coverage, other vendors may offer limited warranties (e.g., 1-3 years).
- Operational conditions: Warranty validity often depends on adherence to recommended operating conditions, such as temperature range, power limits, and fiber type. For example, CFP2-DCO modules generally operate within standard commercial temperature ranges (0-70°C) and require single-mode fiber for optimal performance .
