

What are the uses of cable trays in Saudi Arabia

Overview

A cable tray is a structural system used to support and organize electrical cables, control wiring, data lines, and sometimes even small piping in industrial, commercial, and infrastructure projects across Saudi Arabia. The most common systems used across Saudi industrial projects include cable trays, cable ladders, conduit systems, cable ducts, and cable cleats. Each serves a different purpose. Compared to traditional conduit systems. ADHWA CABLE TRAY is one of the leading cable tray suppliers in the KSA&Middle east, Adhwa supplies a broad line of high quality cable tray systems to the construction, electrical, telecommunications, and industries. Adhwa offers aluminium, mill-galvanized steel, hot-dipped galvanized, (HDG). Wescosa designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Dammam Saudi Arabia. All trays are manufactured and tested in accordance with the latest NEMA and IEC 61537 Standards.
