

What is a DMC distribution box

Overview

A DMC fiberglass distribution box is a durable, non-conductive electrical enclosure widely used in residential, commercial, and industrial power distribution systems. The glass fiber waterproof IP66 FRP DMC or SMC composite as shell molding materials. Made from Dough Molding Compound (DMC) reinforced with fiberglass, these boxes offer excellent thermal stability, high mechanical. Reshma Moulding Works is a Maharashtra, India-based manufacturer and supplier of SMC/DMC Boxes that come in various sizes as per the order placed by our customers. It is made up by using best in class materials that provides high strength to weight ratio with excellent weather resistance. But what exactly is a power distribution box, and why is it so essential in our daily lives?

The DB panel board controls the flow of electricity. Our solutions enable short planning and realization times and allow optimized. A distribution box, also known as a power distribution box or electrical distribution box, is used to distribute electrical power safely to multiple circuits.
