

What is a dual distribution box

Overview

A dual power distribution box functions by controlling the distribution of electrical power from two separate sources to ensure that power is always available. The team focuses on breakers, cable routes, load schedules, and delivery dates, then treats the enclosure as something almost interchangeable. That works only until the installation begins. Each. Use to control 2 groups of luminaires independently of each other (same circuit, separate control) or to control 2 individual circuits of luminaires (2 protective devices at the distribution board (s) - must be the same phase). Regardless of application, these Distribution Boxes support standard. A "Core" is an item that can be remanufactured using replacement parts. Exchange: We ship your order now, and you send us your core within 30 days to get the core charge refunded.
