

What is a single-piece cable tray

Overview

A channel cable tray is a compact, single-piece tray system with a narrow base and raised side flanges. Unlike ladder or trough trays, channel trays are designed to support small cable quantities over short distances. For example, the first selection issue is the environment to which the cable tray will be subjected. Together, these parts form a complete cable management system used to support, route, protect, and organize cables in industrial, commercial, and data center applications. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. Hubbell's NEXTFRAME® Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from ceilings.
