

Where should I report fiber optic cable repairs

Overview

****Note**:** You can report broken fiber on our Report Outage page or by calling our 24/7 NOC for support. This should be left to the professionals who have the appropriate tools and training. It ensures installations are verified, faults are documented, and results are traceable — not only for now but for future reference as well. For contractors and network technicians, a well-prepared report provides the proof of performance required. Our highly-skilled team of professionals specialize in the installation, termination, splicing, and testing of fiber optics technology in virtually every possible environment, including permitting services and challenging right-of-way deployments. Fiber optics has revolutionized the way we transmit and receive data, offering a range of benefits that contribute to its widespread adoption across various industries.
