

# Which Qatar power distribution box is the best

## AI Overview

For high-quality, reliable, and safe power distribution in Qatar, the DELTA series wall-mounted boxes and Bushtorm HRMD91 panels are among the top choices.

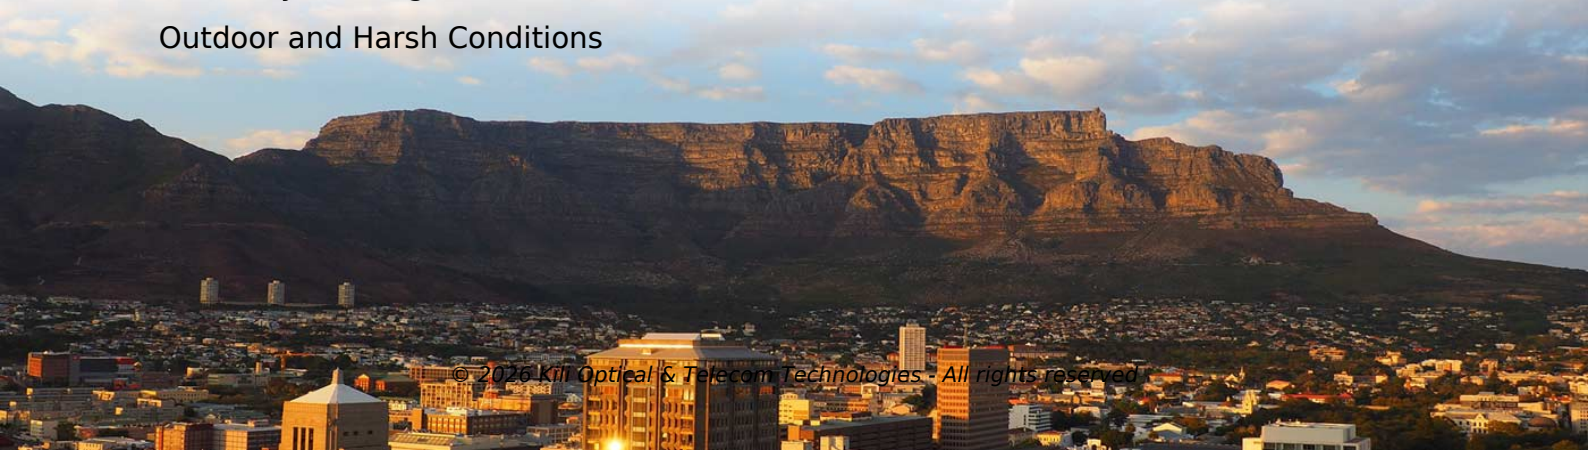

### Residential and General Use

For homes and standard commercial setups, DELTA series distribution boxes from Alsiraj Qatar are highly recommended. These boxes are made from PC/ABS enclosures, offering high impact resistance, thermal stability, dielectric strength, and chemical resistance. They are suitable for both indoor and outdoor use, with UV and weather resistance, making them ideal for Qatar's climate. The DELTA series is modular, allowing horizontal or vertical combinations to fit specific needs, and is certified according to IEC/EN 62208 standards .

### Industrial and Hazardous Environments

For industrial applications or areas with potential hazards, the HRMD91 Copper-Free Aluminium Alloy Distribution Panel from Bushtorm is a top choice. It features a corrosion-resistant, flameproof enclosure suitable for Zones 1, 2, 18, and 22, which are critical in environments with explosive gases or dust. The panel includes a specialized hinge structure to protect flameproof joints and ensure long-term durability, making it ideal for factories, warehouses, and industrial facilities .

### Outdoor and Harsh Conditions
