

Wholesale price of fireproof cable trays in Russia

AI Overview

Fireproof cable trays in Russia typically range from \$50 to \$300 per meter, depending on material, fire rating, and supplier.

Overview of Fireproof Cable Trays

Fireproof or fire-resistant cable trays are designed to protect electrical wiring in industrial, commercial, and critical infrastructure projects. Common types include ladder trays, perforated trays, solid-bottom trays, and wire mesh trays, made from galvanized steel, stainless steel, aluminum, or polymer composites. Fire ratings often range from 60 to 120 minutes, and many trays are halogen-free and low-smoke (LSZH) to comply with safety regulations .

Factors Affecting Price

- **Material:** Stainless steel and aluminum trays are more expensive due to corrosion resistance and fireproofing properties, while polymer or galvanized steel trays are more affordable .
- **Fire Rating:** Higher fire resistance (e.g., 120 minutes) increases cost.
- **Tray Type and Size:** Ladder and perforated trays are generally mid-range, while solid-bottom or specialized compact trays for high-density cabling are pricier.
- **Supplier and Certification:** Domestic suppliers like UralTray, Sevcable Structures, and Moskabelmet offer competitive pricing with compliance to Russian GOST R standards, while imported trays may cost more due to sanctions and import duties .
