

Wireless router fiber optic cable light is on red

AI Overview

A red fiber optic light on your router indicates a loss of signal, meaning your router cannot communicate with your Internet Service Provider (ISP).

Common Causes

- **Fiber Optic Cable Damage:** Physical cuts, bends, or kinks in the fiber optic cable can disrupt the signal and cause the red light to appear .
- **Service Outage:** ISP maintenance or local outages can prevent your router from connecting to the internet .
- **Loose or Faulty Connections:** Improperly connected cables or damaged connectors can interrupt the signal .
- **Router or ONT Malfunction:** A defective router or Optical Network Terminal (ONT) may trigger the red light .
- **Power Issues:** Insufficient or unstable power supply can prevent the router from functioning properly .

Troubleshooting Steps

- **Check for ISP Outages:** Visit your ISP's website or social media pages to see if there is a known service disruption .
- **Inspect the Fiber Optic Cable:** Look for visible damage and ensure the cable is securely connected to the router's WAN/ONT port .
